**Original Website: DuaLipa | Studio 2054 Encore VOD**

Original Website Link
https://www.dualipa.com/studio2054-encore/

HTML Preview Link (Takes approximately 30 seconds to load)
https://htmlpreview.github.io/?https://github.com/Cienna-Kim/SP21-PUFY1225-DIGITAL-CRAFT
/blob/main/html/dualipa.html

1. **Style Component Identification**

- **HTML Instructions = Blue | CSS Instructions = Purple**

A. Logo Header
- Put to center
  - Use class="center" on HTML and display: block;, margin-left: auto;, margin-right: auto; on CSS
  - Alter width on HTML

B. YouTube Video
-   Put to center
    -   Use same class as above, put to center using CSS
    -   Use <iframe> tag to embed video

C. Two Buttons
-   Create buttons
    -   Use <button> tag
    -   Divide the two button classes as 'buynowbutton' and 'entersitebutton'
    -   Use <button…...onclick="window.open ('url')"> to connect to outer link
-   Design buttons
    -   High border radius to make round edges
    -   Display: inline-block
    -   Apply padding to adjust form and size
    -   Apply   in HTML to make space between two buttons

D. Subscription Form
-   Create subscription form
    -   Divide elements of form by using classes 'subscribe_form', 'subscribe_title', 'subscribe_signup', 'success', and 'thank_fail' for layout
    -   Use <form> tag and <input> tag to create subscription form
-   Design subscription form
    -   Use different inputs (input[type="email"] and input[type="submit"]) to manage email address box and sign up button differently
    -   Apply border color, text color, font size, box size, padding, etc.

E. Terms
-   Create 'hide and show' toggle
    -   Use <button onclick="myFunction()" class="terms">TERMS</button> and <div id="myDIV" style="display:none"> to create toggle
    -   Create link for email address that appears when toggling the button
-   Design 'hide and show' toggle
    -   Use separate classes of 'subscribe__terms':after and 'subscribe__terms.active':after to make Terms appear when toggled
    -   Apply a;link and a;visited classes to make all links white at all times

F. Social Media
-   Create social media icons
    -   Use the <image> tag and <div class="icon"> to create icons and group them
    -   Use <img src="../assets/image.png"> to bring in PNG images from the desktop and make the links connected to them open up in new tabs
    -   Apply 'hspace=15' to create space between the icons

- Design social media icons
    - Put all icons in horizontal alignment in the center using CSS

G. Copyright
- Insert copyright text
    - Use the <p> tag and write <p class="paragraph">© 2021 DUA LIPA LTD</p> to create the copyright text
- Design copyright text
    - Adjust the font size for the 'paragraph' class similar to the original page

H. Settings & Cookies
- Insert settings & cookies
    - Use the <p> tag and <a href> tag to create text links that open up linked URLs
    - Use   to create the adequate spacing between text links
- Design settings & cookies
    - Adjust the font size and text design using the same 'paragraph' class

2. **Note of Structural Changes**

● My original code for this website is saved as a separate HTML file on my GitHub repository.

    - Original code: dualipaoriginal.html
      https://github.com/Cienna-Kim/SP21-PUFY1225-DIGITAL-CRAFT/blob/main/html/dualipaoriginal.html
    - Final code: dualipa.html
      https://github.com/Cienna-Kim/SP21-PUFY1225-DIGITAL-CRAFT/blob/main/html/dualipa.html

● Below is a brief summary of the key changes made.

    ● The 'buynowbutton' and 'entersitebutton' are now sorted under <div class="buttons"> and <div class="action_btn">

    ● The 'Terms' button, or the dropdown button, has been changed to <button onclick="myFunction()" class="terms">. This function now hides the terms content unless the user clicks on the button.
